

July 8, 2006

Dear FTC,

I am aware, on April 5; the Federal Trade Commission (FTC) issued a Notice of Proposed Rulemaking (NPR) regarding business opportunities.

If adopted, I understand this rule could have a serious impact on our industry, requiring direct selling companies to drastically alter their sales methods, which places additional burdens on direct sellers such as me, in order to comply with federal law.

Please do not change the way this incredible industry is run! We have the opportunity to radically change so many lives around us and provide people with freedom and hope! Please don't put a lid on the possibilities of what being an entrepreneur is all about!!

I am concerned that this ruling would entirely change our industry as a whole and impact millions of lives in an extremely negative and detrimental way!

This ruling would alter what Network Marketing and the DSA is all about.....FREEDOM!

Sincerely,
